

Methode	Feature	Description
public static void add()		Request Body : candidate or instructor
public static void update()		Request Body : candidate or instructor with a parameter Id + update only modified attributes without changing the others
public static void delete()		with a parameter CIN, delete the candidate or instructor
public static Person search()		with a parameter CIN, return the candidate or instructor without parameters, returns all
public static ArrayList<Person> getAll()		Request Body : car or moto or truck
public static void add()		Request Body : car or moto or truck with a parameter Id + update only modified attributes without changing the others
public static void update()		with a parameter Id, delete the car or moto or truck
public static void delete()		with a parameter Id, return the car or moto or truck without parameters, returns all
public static Vehicle search()		Request Body : seanceDriving or seanceCode
public static ArrayList<Vehicle> getAll()		Request Body : seanceDriving or seanceCode with parameters date, idInstructor + update only modified attributes without changing the others
public static void add()		with parameters date, idInstructor delete the seanceDriving or seanceCode
public static void update()		with parameters date, idInstructor, return the seanceDriving or seanceCode
public static void delete()		with a parameter idVehicle, return the seanceDriving
public static Seance getByDateAndIdInstructor()		with a parameter idCandidate, return the seanceDriving or seanceCode
public static ArrayList<Seance> getByIdVehicle()		with parameters idInstructor, return the seanceDriving or seanceCode
public static ArrayList<Seance> getByDate()		with a parameters date, return the seanceDriving or seanceCode without parameters, returns all
public static ArrayList<Seance> getAll()
